You are good to go in this competency for the given role

You need to improve/align further in this competency to be shortlisted for all such roles

You need to improve/align significantly in this competency to be shortlisted for all such roles

You fall below the eligibility criteria in this competency for the given role

# In-depth Report

In depth report on each skill aspect with descriptions of your strengths and improvement tips to work on each area

## Your Strengths

### English

5

You are proficient in English usage. You should continue practicing through reading and writing to ensure you keep improving

### Analytical

5

You are strong in logical ability and can solve problems quickly. Keep practicing to keep yourself updated with new types of problems!

### Quantitative

5

You are good in math and are comfortable in using numbers on an everyday basis. You should continue practicing solving problems to keep up your speed and accuracy

# In-depth Report

## WET

5

You are proficient in writing English. You should continue writing and reading in different contexts to improve further.

## Computer Fundamentals

5

You have strong knowledge of Computer Fundamentals. Since IT companies look for this, it is advised that you keep learning and improving in your weak areas.

## Domain

4

While you are good in some areas of your domain, you can improve in others. Identify your weak areas and practice to improve your application of concepts

# In-depth Report

## Coding

4

While you have some background of coding, you need to improve further to become fit for attractive roles. Identify your weak areas and practice more by writing code

Below map classifies your personality based on the traits of the "Big Five" Model. Remember that a low percentile does not mean bad performance and high percentile does not mean good performance, as there is no concept of performance in personality. It is just a measure of who you are as a person. This is important because different job profiles suit different kind of people.

The personality map below shows where your position is relative to the population across different personality traits. Each bar represents your Z-score for a personality trait.

## The Z-Score

For each trait, a Z-score is provided. The Z-score measures the number of standard deviations the score is away from mean of norm. A Z-score more than +0.44 means the candidate is in the top 33%, whereas a Z-score of less than -0.44 represents the candidate is in the lowest 33%.

## What does "Low", "Medium" or "High" mean?

The classification above in terms of "Low", "Medium" or "High" is a relative positioning of you as compared to the large sample of entry level candidates that have been assessed. For instance, a person who is high on Extraversion is as extraverted as the top 33% people in the control group .He/She may not still be extraverted enough for a given role or a standard set by another individual.

## "Low" does not mean "Bad"

A trait score of HIGH or LOW does not classify someone as GOOD or BAD. Every individual has a unique personality and different people in different kind of jobs need different personality combinations. A person with a given personality profile may be inclined to perform better in a sales job while another with a different personality may be more suitable for a software development role.

# Competency Result

Detailed description of your profile on each behavioral competency

## Openness - General appreciation for imagination and variety of experience.

You are likely to have a balanced view towards experimentation and learning. Likely to exercise controlled experimentation in problem solving.

## Conscientiousness - Tendency to show self-discipline. Planned rather than spontaneous behavior.

You will tend to have a high level of self discipline and will generally take a planned approach towards a problem.

## Extraversion - Characterized by positive emotions. Enjoying company of others.

You are an extrovert and likely to be assertive, talkative and cheerful. Likely to be successful in customer/team oriented jobs.

# Competency Result

## Agreeableness - Tendency to be compassionate and cooperative.

You are likely to be a balanced mix of being able to work in teams as well as putting own interests at priority. Assertive for self rights without hurting others.

## Emotional Stability - Tendency to remain balanced in ordinary situations. Desirable trait.

You are likely to be emotionally stable and free from persistent negative feelings. Personality wise you should do well in all roles.

This report is designed to provide insights on your performance and improvement areas across various modules that are critical for building successful career.
